G-Elevator

Feeding system for Aerosol Bottom and Domes

Magnetic spreader

KSM, the well reputable specialist for any kind of transportation of both, ends and cans is now under the roof of Lanico with the new name Lanico-Conveying Systems. All types of extended end-feeding devices for the Lanico CanFormer, our stainless seamers for the canning industry and other special machinery are now designed and manufactured in-house Lanico.

In addition to the end feeding systems dedicated to Lanico machines, end feeders for any other kind of application at speeds up to 1700 epm can be supplied. Furthermore, we design and supply complete transport systems for can-making lines with all imaginable can types and line speeds, tailor made according to the individual requirements.
